

Interactive Multiswitch Impresja IQ

Did you turn the iron off? Did you close all the windows? Who's currently in your house? Thanks to the Interactive Multiswitch Impresja IQ, you'll have constant and full control over your house. Make the reliable CAN technology responsible for lots of daily chores, that can be automated. Cheap and easily applied system will change the way you look at your home. What is the CAN technology?

One of the best systems ever created is now used in places, where reliability is crucial. Aviation, military and automotive designers use it for the most important tasks. Thanks to Interactive Multiswitch Impresja IQ you can introduce the technology tested in the extreme conditions... in your house.

What can CAN technology do for you in Interactive Multiswitch Impresja IQ?

- selecting the light scenes
- temperature regulation
- moving jalousie
- intercom connection between rooms or floors in a house
- and much more!

How is Impresja IQ different to other systems?

- it has voice interface
- it can be personalized through personal computer
- it can be updated constantly, just by changing the software

Interactive Multiswitch Impresja-IQ is designed in „all in one” technology, so the control over all the devices in your house is embedded in just one module. The European design and manufacturing guarantee the reliability and ease of use. Every node of the system features all the crucial elements for home supervision. Thanks to the miniaturization, all these nodes may be installed in electrical boxes, so there's no need for adding additional space for installation you don't need to make your house compatible for Interactive Multiswitch Impresja-IQ. The voice control interface may operate in 25 languages. You can add touchscreen PLC panel, which provides centralized control over the whole system. New functions may be added later through software upgrade the physical interference won't be needed. The development of the multiswitch introduces innovations, based on the european Ambient Assisted Living project. Basic synthetic voices for Impresja IQ produced by IUONIA® text-to-speech synthesiser (IUONIA is a registered trademark of IUO Software).

Take control of your house!

Interactive Multiswitch Impresja IQ full control, easy installation and low price.
